

## Product / Services stories From All about Floors

7 February 2007

**All about Floors presents its syrupy collection of epoxy floors. Get your sugar hit here. Our Designer floors are easy to maintain, durable and look great in any situation, Commercial. Industrial. Domestic. All About Floors can estimate and specify any project within Australia.**

### Caramel Jersey

Vanilla fudge sandwiched in between two caramel fudge layers. Back in those wonderful childhood days when you could get five for ten cents at your local corner store, Caramel Jersey's never tasted so good.

Revisit that time. More caramel than vanilla, this floor reminds you of the childlike influence that sneaks into your life when you least expect it. .

### Honey

What better place to have a honey reminder than in a supermarket. This natural healer kills bacteria, disinfects wounds, soothes sore throats and alleviates asthma. All about Floors can't promise all that but can promise to alleviate dust build up assisting asthmatics to breathe better.

This is one of the many advantages of epoxy flooring. Not only is it environmentally friendly but it is lung friendly. Unlike carpet and tiling, dust and dirt can build up in fabric or grout. Epoxy Floors are seamless, easy to clean and maintain and all those unsavory germs don't hang about.

As sticky as honey is, the only thing that sticks is the uniqueness of your floor.

### Turkish Delight

This translucent red seamless floor looks like your walking on a squishy bed of jelly but in fact, you're walking the toughest and most durable flooring finish in the world.

This hand trowelled delight is much like hand made Turkish Delight. One part product, one part time and one part creative skill.

## Product / Services stories From All About Floors

21 February 2007

Without all the technical jargon, put simply, Epoxy is the protective coating on a concrete floor. *You can be the designer of this concrete coating. At All About Floors our philosophy is simple 'you DESIGN it, we CREATE it.'*

All About Floors can estimate and specify any project within Australia, Commercial, Industrial, and Domestic.

### COMMERCIAL FLOORS

All about Floors can specify and apply all types of commercial flooring including designer, epoxy self-leveling floors, seamless floor finishes, concrete protection and waterproofing.

Epoxy is ideally suited for all floor types as it is seamless and is bonded direct to the substrate.

This 'open to the public' pharmacy warehouse has the company logo on the floor and shows the 'new look' for warehouse floors. It gets a lot of foot traffic so it needs to be tough and easy to maintain.

### A WINNING FORMULA

In an environment where there may be spills, drips, skids or abrasions, you need a floor that will stand up to these everyday occurrences.

Our seamless industrial floors meet Australian standards for slip resistance and resist marking and staining.

Combine all this with a distinctive looking floor and you have the winning formula.

### INDUSTRIAL FLOORS

From 20 to 2000 sqm, a factory, warehouse, commercial kitchens or retail space, we can provide you with a floor that will be non-slip, easy to maintain, and environmentally safe.

Our products are safer to use, emitting no harmful VOC's and are moisture tolerant.
